

# IT ALL FLOWS DOWNSTREAM

F.O.G. - Trash - Oil - Debris - Silt - Drugs

HOW DO WE KEEP  
OUR WATERWAYS CLEAN?

# ELASTEC HAS SOLUTIONS

## FOR SURFACE WATER POLLUTION AND MUNICIPAL MAINTENANCE

From storm water runoff's first flush to flushing drugs into our sewer systems - trash, oil spills, silt, F.O.G. (fats, oils and grease), pharmaceuticals and aquatic weeds pollute our waterways every day. Elastec develops simple and cost-effective solutions to keep our streams, rivers and oceans protected from surface water contaminants.

### DRUG DISPOSAL

The ELASTEC Drug Terminator destroys evidence narcotics, paraphernalia, pharmaceuticals and take-back drugs, preventing them from tainting waterways.

### FLOATABLES COLLECTION

The ELASTEC Omni Catamaran skims floatables into its litter basket to keep storm water canals and waterways free from debris.

### DEBRIS CONTAINMENT

Elastec manufactures heavy-duty booms and turbidity curtains for controlling trash, debris, aquatic weeds, silt and sediments.

### FATS, OILS & GREASE COLLECTION

Elastec manufactures a full line of oil skimmer systems for spill response and F.O.G. collection.

### WET WASTE CLEANUP

The Elastec Portable Air Conveyance System (PACS) is a trailer-mounted purpose-built "mean-cleaning-machine" for off-road jobs in places like rough and rugged oil fields. It vacuums up tough stuff – gravel, drilling mud and crude oil spills. With the introduction of water, PACS can also clean up mulch, silt, sand, litter and leaves.

PACS is designed to go where large vacuum trucks can't or where vac trucks are not cost-effective. The trailer-mounted system is easily towed with a pickup truck, dump truck, fork truck or tractor in the tight workspaces of refineries, drilling or construction sites or manufacturing facilities.

# ELASTEC MANUFACTURES INNOVATIVE POLLUTION CONTROL EQUIPMENT TO KEEP OUR WATERWAYS CLEAN.

Elastec is the largest manufacturer of oil spill response equipment in North America with distribution in 155 countries. Our floating barriers, curtains, booms, skimmers, fire boom, work boats, portable incinerators, vacuum systems, pumps and power units work around the world to keep our waterways clean.

Oil Spill Recovery

Floating Booms & Curtains

Portable Incinerators

Work Boats

Vacuum Systems

Pumps & Power Units
